

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

JANUARY 19.

The President, SAMUEL G. DIXON, M.D., in the Chair.

Twenty-two persons present.

The Publication Committee reported that the following papers had been received for publication:—

“Observations on Tupaia, with Reflections upon the Origin of Primates,” by Henry C. Chapman. (January 5.)

“New Japanese Marine Mollusca,” by Henry A. Pilsbry. (Jan. 9.)

“The Arachnida of Florida,” by Nathan Banks. (January 12.)

“Sabellidæ and Sarpulidæ from Japan,” by J. Percy Moore. (January 18.)

“New Japanese Marine Mollusca: Pelecypoda,” by Henry A. Pilsbry. (January 18.)

A paper entitled “A Collection of Fishes from Sumatra,” by Henry W. Fowler, had been accepted for publication in the JOURNAL and would conclude the twelfth volume.

Note on the Characinidæ.—MR. HENRY W. FOWLER desired to place on record the following:

EUCYNOPOTAMUS nom. nov.

Evermannella Eigenmann, Smithsn. Miscel. Coll., XLV, December 9, 1903, p. 146 (*biserialis*).

Mr. Fowler was indebted to Mr. E. L. Goldsborough, of the United States Fish Commission, for calling attention to the name *Evermannella*, which has recently been employed by Dr. Eigenmann for a genus of *Characinidæ*. The speaker had previously applied the name to the *Odontostomidæ*.¹ (*Eῶ*, properly; *κύων*, dog; *ποταμός*, river.)

The following were ordered to be printed:

¹ *Proc. Acad. Nat. Sci. Phila.*, LIII, 1901 (1901–2), p. 211.
